

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS My customer is a bank manager he trying to Recognize the digits in cheque.	6. CUSTOMER CONSTRAINS: CC The bank manager recognize the digit but is not clear because of unique style of handwriting.	5. AVAILABLE SOLUTIONS: AS The bank manager can predict the cheque handwritten digit to complete the transaction.	Explore AS, differentiate
Focus on J&P, tap into BE, understand RC	2. JOBS-TO-BE-DONE / PROBLEM: J&P The cheque hand writing is not clear but the money transaction can not completed	9. PROBLEMROOT CAUSE: RC problem cause is hand written is not clear Hence the transaction is not complete	7. BEHAVIOUR: BE The customer want to money transaction But the bank manager didn't understand the handwritten and digit hence the transaction is not compete	Focus on J&P, tap into BE, understand RC
Identify strong TR & EM	3. TRIGGERS TR problem is hand written is not clear each check take more time the bank manger had irritated 4. EMOTIONS: EM The cheque handwritten digit is not understand it take more time the hence bank manager annoyed	10. YOUR SOLUTION SL Use the MINIST Dataset to recognize handwritten digits convolutional neural network model created using pytorch library to solve the problem	8. CHANNELS of BEHAVIOUR CH The customer want to money transaction But the bank manager didn't understand the handwritten and digit it's take more time hence the transaction is not compete he had annoyed	Extract online & offline CH of BE
